SUMMARY

Computer Engineering student with hands-on experience in backend system development, cloud deployment, and secure CI/CD pipelines. Experienced in Go and Node.js, delivering secure and scalable APIs used by 4,000+ users, with experience working in Agile/Scrum teams and delivering reliable features for real users, eager to learn and contribute to real-world user-facing products.

EDUCATION

Chulalongkorn University
Bachelor of Engineering in Computer Engineering | GPA 3.46

- Relevant Coursework: Software Engineering, Database Systems, Computer Networks, Operating Systems
- Core Team of Google Developer Group on Campus: Technical Team
- Teaching Assistant: Database Systems

WORK EXPERIENCE

Chulalongkorn University (ISD), SGCU July 2025 – present
Software Developer – Information System Development

- Implemented secure authentication and authorization using JWT and Role-Based Access Control, ensuring granular access management for over 4,000 users across different organizational roles.

CU-first date, Rub Puen Kao Mai
Backend Developer - Freshman Engagement Platforms

- Developed RESTful APIs for staff registration and data validation, ensuring data integrity for high-volume freshman events.

PROJECTS

ThamRoi – Full-Stack Travel Companion Platform 2025
Scrum Master / Backend Developer / DevSecOps

- Implemented JWT-based authentication and role-based access control to protect user data and enforce proper permissions.
- Designed and implemented a CI/CD & Security pipeline with GitHub Actions to automate testing, security checks, and deployment, reducing manual release steps and improving delivery reliability.
- Implemented unit and end-to-end tests for backend APIs.
- Collaborated with cross-functional teammates as Scrum Master to plan sprints, track progress, and deliver features on schedule.

GoGotalkie – Real-time WebSocket Chat 2025
Team Lead / DevSecOps

- Developed a WebSocket-based chat service in Go, handling concurrent connections and secure message routing.
- Built a DevSecOps pipeline integrating OWASP Dependency Check and Trivy, enforcing quality gates that reject vulnerable code commits.
- Automated containerized deployment to Google Cloud Run, achieving zero critical-severity vulnerabilities.

SKILLS & INTERESTS

- Technologies: Node.js, Go, Python, Express, React, PostgreSQL, MongoDB, Docker, Kubernetes, Git, GitHub Actions, AWS , Google Cloud Platform , Grafana, Prometheus, Terraform.
- Skills: Backend Development, Full-Stack Development, CI/CD Pipeline Design, Containerization, REST API, System Design, Database Management, Agile , End-to-end Testing, Unit testing.
- Interests: DevOps, DevSecOps, Cybersecurity, Cloud Security, Cloud Infrastructure Automation, Distributed Systems, Software Architecture, Site Reliability Engineering.
