SUMMARY

Computer Engineering student with hands-on experience in Go/Node.js backend development, AWS cloud infrastructure, and DevSecOps CI/CD pipelines. Delivered scalable APIs for 4,000+ users; Research Assistant on a production clinical platform across 4 hospitals. Passionate about Cloud Security, Infrastructure Automation, and Site Reliability Engineering.

EDUCATION

Chulalongkorn University
Bachelor of Engineering in Computer Engineering | GPA 3.46

- Relevant Coursework: Software Engineering, Database Systems, Computer Networks, Cloud Computing
- Core Team of Google Developer Group on Campus: Technical Team
- Teaching Assistant: Database Systems, Software Engineering

WORK EXPERIENCE

Chulalongkorn University (ISD), SGCU July 2025 – present
Software Developer – Information System Development

- Implemented secure authentication and authorization using JWT and Role-Based Access Control, ensuring granular access management for over 4,000 users across different organizational roles.

CBME-iPDM (Wannoi) – Precision Diabetes Management Platform Dec 2025 – present
Research Assistant, Software Developer

- Resolved critical production bugs across Go backend and Next.js frontend; hardened CI/CD pipeline with automated security gates, improving deployment safety for a 4-hospital collaboration.
- Enhanced UX/UI for patient management dashboards and improved lab data entry accuracy, reducing clinical staff friction across daily operations.

PROJECTS

ThamRoi – Full-Stack Travel Companion Platform 2025
Scrum Master / Backend Developer / DevSecOps

- Implemented JWT-based authentication and role-based access control to protect user data and enforce proper permissions.
- Designed and implemented a CI/CD & Security pipeline with GitHub Actions to automate testing, security checks, and deployment, reducing manual release steps and improving delivery reliability.
- Implemented unit and end-to-end (E2E) tests for backend APIs.
- Collaborated with cross-functional teammates as Scrum Master to plan sprints, track progress, and deliver features on schedule.

Chillpibara – Peacemaker AI Discord Bot 2026
Cloud Infrastructure / DevSecOps

- Designed and provisioned full AWS infrastructure using Terraform with 9 modular configurations for a Python Discord bot.
- Built GitHub Actions DevSecOps pipeline to automate Docker image builds, security scanning, and deployment to Amazon ECS.

SKILLS & INTERESTS

- Technologies: Node.js, Go, Python, Express, React, PostgreSQL, MongoDB, Docker, Git, GitHub Actions, AWS, Google Cloud Platform, Grafana, Prometheus, Terraform.
- Skills: Backend Development, Full-Stack Development, CI/CD Pipeline Design, Containerization, REST API, System Design, Database Management, Agile, End-to-end Testing, Unit Testing.
- Interests: DevOps, DevSecOps, Cybersecurity, Cloud Security, Cloud Infrastructure Automation, Distributed Systems, Software Architecture, Site Reliability Engineering.
